

Traveler Security Key Features

- Quickly locate travelers anywhere in the world at anytime
- Easily access information to contact travelers on the road
- Receive alerts when too many employees or executives are booked on the same flight
- Access valuable reports such as, travelers to high risk countries, top markets, hotel rate summary, and many more

Overview

Much as you'd like, business travelers don't operate within the confines of a bubble. Whether it's a weather event, political situation or labor strike, there are countless scenarios that can affect and potentially disrupt your travelers' plans. The frequency and severity of world events has grown substantially in the past few years, increasing the need for fast and accurate information. You should have the confidence to be able to locate and reach your road warriors 24/7.

Traveler Security allows corporations to quickly locate travelers worldwide and access detailed content, such as travel reservation and personal contact information. The product also provides the ability to query and obtain additional reports for 331 days of pre-trip and three years of historical trip data, including ticketed and un-ticketed data.

How It Works

Upon signing into Traveler Security via a secure web link, the application displays the locations of all current travelers. Users can search further to view expanded results based on date, city and country ranges, and find travelers based on flexible search criteria. Users can also drill down within maps to see travelers by specific locations. You can even access your traveler's itinerary for more detail using an easy link to *Sabre® Virtually There®*.

Travel Manager Benefits

As a travel manager, you want to provide the services that allow your travelers to be as efficient and productive as possible while on the road. Outside of being easy-to-use and always up-to-date, Traveler Security is a tool you can take advantage of dynamically. Use it to proactively re-accommodate travelers when they'll be impacted and help them do better business. By creating an environment where you can be more cost efficient, you'll watch your company's results flourish.

Company Benefits

Up-to-date, accurate, actionable and secure – *GetThere* has taken a comprehensive approach to providing you with traveler data. Traveler Security is also an affordable solution for any size company. Maximize the program's value by locating travelers in mere seconds and deftly managing them with relevant and timely data. For small and mid-sized corporations, Traveler Security provides traveler risk management features without the cost of having to go through a travel agency.

Traveler Benefits

While you have the peace of mind that you can quickly and easily reach your travelers, they will likewise feel the assurance that someone will contact them if any situation should arise. But it's not only about simple alerts – with the nearly instantaneous information provided by Traveler Security, you can act fast to alter itineraries and re-accommodate travelers. With actionable data, you can be proactive to further ensure safety and drive convenience for your road warriors.

Traveler Security Key Benefits

- Access easily, securely 24/7
- Receive and utilize data that is complete, accurate and actionable
- Save time in critical situations
- Reduce security risks
- Meet many business needs with reporting

A Superior Business Intelligence Tool

A Web-based application, Traveler Security gathers information from reservations made in Sabre, assuring you that it's up-to-date, accurate and consistently reliable. Historical and pre-trip data is automatically stored for all Sabre reservations, both ticketed and un-ticketed. Air, car, hotel, cruise and rail segments are included. The warehouse stores PNR information within an average of 30 minutes when a reservation is completed. Traveler Security also collects data from reservations made offline, and automatically updates the database for all reservations.

Data Reporting Capabilities

Data reporting is another robust component of Traveler Security. Detailed air, car and hotel data is immediately available for 331 days of pre-trip and three years of post-trip data for reservations made through Sabre. Approved users can query this data to identify and manage various operational and business needs, as well as leverage it to negotiate supplier rates, manage travel policy compliance and identify travel trends. In-depth reports include contact information and complete reservation data.

Reports can be used to assess a corporation's top markets, travelers to high risk countries, and more:

Carbon Emissions –

- Summary of all air segments by date range
- Detail breakdown of carbon emission impact by origin and destination

Air Market Share Summary –

- Top four carriers for user-selected origin and destination, segment count and share percent
- Historical, advance bookings, or a combination of both

Air Market Share Trend –

- Month-over-month, quarterly and year-over-year trends for a single origin and destination
- Historical, advance bookings, or a combination of both

Hotel Rate Summary –

- Average nightly rate, number of days and total spend per city

Powerful Security

Ensuring your employees safety when they travel is highly critical – perhaps one of your most important job functions. The Traveler Security Flight Threshold Report feature alerts users when the total number of employees or executives booked on one flight exceeds corporate policy. And with live email links, you can quickly contact travelers in the case of an emergency.

Experience Even More from GetThere
